Analog Lightning Reverse 2025 Plus

A professional kit designed for cars with reverse lights which are controlled by analog plus-signals. The Analog Lightning Reverse-kit includes an electronic controller together with required cablings for an easy connection to auxiliary reverse lights. The kit also includes a switch that may be used to activate the auxiliary reverse lights when the vehicle is parked, without using the gear shift, e.g. as working lights.

Technical data:

Rated voltage: 12/24VDC

Output current: 25A

Current consumption: 2mA

Electronic overheat protection: +150°C

* Screw not included
